Clinical Data: DOSAGE : 1G
DATE AND TIME OF LAST DOSAGE: 17/09/25 16H00

Tests requested: AMIKACIN PRE

Referral ICD10 C37
code(s):

Ch Biochemistry

0918:BA05890H

Final

Test Name	Result	Flag	Reference Range
AMIKACIN TROUGH	< 2.3		ug/mL

TROUGH LEVELS
Once daily dosing : <=5 ug/mL
(preferred if CrCl >= 30mL/min)
Twice daily dosing* : <=10 ug/mL
(preferred if CrCl < 30mL/min)

Toxicity may occur if the trough serum concentration is maintained >10 ug/mL for prolonged periods of time.
Trough levels are used only to monitor toxicity, not efficacy, and assist in ascertaining whether the once daily dose can be repeated, adjusted or omitted.
On some instruments utilized by Pathcare the lowest level of detection is a value of 2.3 ug/mL.
*Twice daily dosing is preferred for Gram positive synergy, endocarditis, hemodialysis, ascites, burns, and pregnancy.

The interpretation of laboratory test results requires the clinical evaluation to be known and contextualised. Please contact your medical practitioner for any questions related to these results. Your doctor would know whether further consultation with one of our specialist pathologists is necessary.
