PATIENT: JAN-MARTEN DALING
PATIENT ID NO: 8305145088089
PATIENT PASSPORT NO:
REFERRED BY: MULLER, C
REFERENCE: GR049571A

WARD: GMC ICU

CT BRAIN

History:

41-year-old male patient. Poorly differentiated squamous cell carcinoma anterior mediastinal location with right-sided lung metastases and pleural lesions. Raised B HCG levels. Possible mediastinal seminoma. Complaining of visual symptoms intermittently.? Brain metastases.

Comparison:

None relevant at time reporting.

Technique:

Pre and post intravenous contrast CT Brain.

Findings:

No intra or extra-axial lesions.
No basal or leptomeningeal enhancement.
Ventricles are normal.
Basal cisterns are patent.
Normal CP angles.
Basal ganglia are normal.
Normal cerebellum and brainstem.
Normal pituitary gland.
Orbits are normal. No intra or extraconal enhancing lesions.
No dural venous sinus thrombosis.
Calvarium, base of skull and facial bones are normal.

Assessment:

Normal CT brain.
No features of intra or extra-axial metastases.
